

ABSTRACT

Providing a reproducing apparatus of an in-car disk player, a method and a program for controlling reproducing apparatus. The reproducing apparatus, which is portable and
5 can be carried home, has reproducing means for reproducing data recorded in a disk-shaped recording medium, a sensor section for detecting the state of a vehicle, and control means for changing a reproducing speed of the reproducing means based on the result detected by the sensor section,
10 and can surely copy data recorded in an optical disk to a recording apparatus such as a hard disk drive apparatus, even inside a vehicle, without an excessive vibration countermeasure such as cushions, by changing a reproduction speed of a disk-shaped recording medium.
